

# Some Steps you Need to Do

[1] open Telegram and search for (/BotFather)

[2] type (/newbot) , add your name , then bot's name

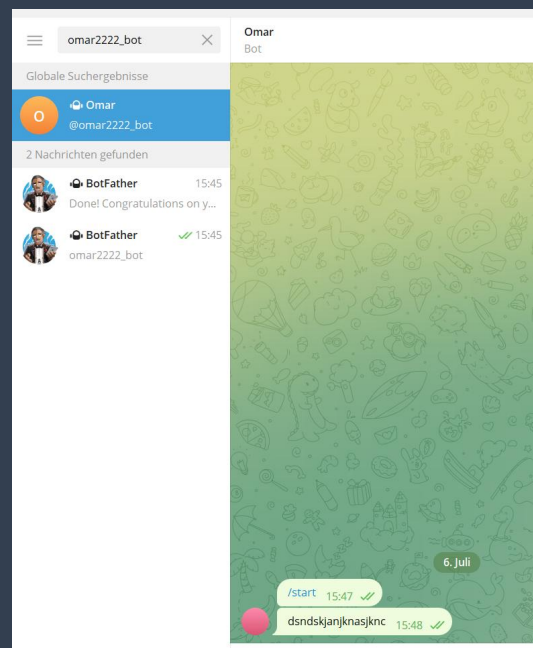

[3] copy the token

Use this token to access the HTTP API:

6316686314:AAHkWjBL570w\_kqU8FFocHVXrd1HwsSAyx0

Keep your token secure and store it safely, it can be used by

[4] Open your bot and type anything on it

[5] Jump to the script (imp.py) , open it , replace "TOKEN HERE" by the copied token and run

```
import requests

"""
replace "TOKEN HERE" with the token id you copied from telegram
e.g. 6316686314:AAHkWjBL570w_kqU8FFocHVXrd1HwsSAyx0
"""
token = "TOKEN HERE"

url = f"https://api.telegram.org/bot{token}/getUpdates"
print(requests.get(url).json())
```

[6] after running you will see strange output , just search for "id" and copy it

=> this case id = 1251062847

[7] jump to (main.py), replace TOKEN HERE & ID HERE with the copied ones

```
## add the token here
token = 'TOKEN HERE'

## add the id here
chat_id = "ID HERE"
```

```
1 import requests
2
3 """
4 replace "TOKEN HERE" with the token id you copied from telegram
5 e.g. 6316686314:AAHkWjBL570w_kqU8FFocHVXrd1HwsSAyx0
6 """
7
8 token = "6316686314:AAHkWjBL570w_kqU8FFocHVXrd1HwsSAyx0"
9
10 ! = f"https://api.telegram.org/bot{token}/getUpdates"
11 print(requests.get(url).json())
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL JUPYTER

```
python311/python.exe "e:/Studio/Season 2023/[5] Juli/Upwork/Proposal 2 - Windows Notifications/imp.py"
{'ok': True, 'result': [{'update_id': 984293228, 'message': {'message_id': 3, 'from': {'id': 1251062847, 'is_bot': False, 'first_name': '.', 'last_name': '.', 'username': 'hd_inelmd', 'language_code': 'de', 'chat': {'id': 1251062847, 'first_name': '.', 'last_name': '.', 'username': 'hd_inelmd', 'type': 'private'}, 'date': 1688647999, 'text': 'sdad'}}]}]}
PS C:\Windows\System32\WindowsPowerShell\v1.0>
```

AFTER THAT RUN main.py and that's it :)
